BRAXTEN ORLINE P. URDELAS

Bachelor of Science in Information Technology -Freshman

SUMMARY

I am a BSIT freshman at TUP Manila with a growing interest in software engineering, and technology. As a beginner in the IT field, I am continuously developing my programming and problem-solving skills through hands-on projects and self-directed learning. I am eager to explore AWS Student builder group, collaborate with fellow students, and gain practical experience by building projects that can strengthen my skills and contribute to the community.

EDUCATION

Dalandanan National High School
STEM GRADUATE
With Honors
2022 - 2026

Technological University of the Philippines - Manila
BSIT Freshman
2026 - Present

ACHIEVEMENTS

- STEM Graduate with Academic Honors
- Batch 2025-2026 Top 35th Graduate

GOALS

- Build a strong foundation in Information Technology and programming.
- Continuously improve my problem-solving and technical skills.
- Gain practical experience through projects, teamwork, and inter nships.
- Explore software development, game development, and other areas of technology.
- Develop the skills and experience needed to pursue a career in the IT industry.

SKILLS

- Beginner programming knowledge in C, C++, JavaScript, Python, and Java
- Basic HTML and CSS for developing simple web interfaces
- Fundamental understanding of programming logic, conditionals, loops, and problem-solving
- Experience building beginner-level applications and games through personal projects
- Basic experience with Git and GitHub for managing and documenting projects
- Willingness to learn new technologies, collaborate with others, and improve through hands-on projects

PROJECTS

C.C CALCULATOR | HTML, CSS, JAVASCRIPT
Developed a scientific calculator with basic and advanced mathematical operations, keyboard support, expression handling, and a custom user interface.
https://github.com/Brax1000/C.C-Calculator-

C-FOUR: BOMB DEFUSAL SIMULATOR | C
Created a console-based bomb defusal game featuring interactive gameplay, difficulty levels, randomized codes, limited attempts, and game logic implemented in C.
https://github.com/Brax1000/C-Four---Bomb-Defusal-Simulator

BASIC CALCULATOR | C++
Developed a basic command-line calculator in C++ to practice arithmetic operations, user input, and fundamental programming logic.
https://github.com/Brax1000/BasicCalc_CPP

HANGMAN GAME | PYTHON
Created a simple command-line Hangman game in Python as a practice project to strengthen programming fundamentals and game logic.
https://github.com/Brax1000/Hangman-Game-in-Python
